

South Carolina Department of Natural Resources

Robert H. Boyles, Jr.
Director

Lorianne Riggan, Director
Office of Environmental Programs

The Coastal Zone Management Act of 1976, as amended (Title 48, Chapter 39 of the South Carolina Code of Laws) requires the South Carolina Department of Health and Environmental Control, Office of Ocean and Coastal Resource Management to consider the extent to which the development could affect the habitats for rare and endangered species of wildlife of South Carolina's coastal zone. All information must be complete before our review can begin. Incomplete forms will be returned without comment. Please allow thirty (30) days from receipt for review of a project. Comments may be emailed to environmental@dnr.sc.gov or by clicking the Submit Form below once the form is complete.

Live Life Outdoors

1. Briefly describe in detail the plans for the site (e.g., what structures will be needed (buildings, parking areas, culverts, utility lines, etc.), amount of wetland/stream impacts for fill (square feet and acres), if tree clearing or grading will be required, etc.):

2. Will this project involve phases of development or phases of construction for an NPDES? If so, please describe the work to be conducted.

3. Describe the existing habitat types on site with as much detail about aquatic features and vegetation. Please describe the habitat communities using [The Natural Communities of South Carolina](#), supplemented with the [A Guide to the Wildflowers of South Carolina](#) or the [Flora of the Southeastern United States](#).

4. Describe the current and past land use within the project area (e.g. farmland, forest, developed, open, pasture, etc.).

5. Was a threatened or endangered species review or assessment completed for your proposed project? If not, please contact the please contact the SCDNR to request a T&E report from the SCDNR Natural Heritage Tool by emailing speciesreview@dnr.sc.gov. Once the T&E report is completed, please complete the remainder of this form and provide the report as an attachment to this form to environmental@dnr.sc.gov and the appropriate DHEC OCRM CZC Project Manager.

Please note that depending on the results of the report and the habitats on site, a formal T&E assessment and associated surveys may be required.

6. If known, describe any state or federal listed species that occur within the project footprint or within one mile of the project site. Describe the habitat requirements for each species and determine if the habitats exist within the project footprint.
7. Does the proposed project area occur in a parcel with adjacency to (e.g., shared boundary or across the river from) any SCDNR protected lands? If so, please provide the distance in miles or feet from the proposed project area and list which SCDNR properties are adjacent.
8. Is the project area adjacent to (e.g., shared boundary or across the river from) any other state, federal or privately protected lands? If so, please provide the distance in miles or feet from the proposed project area and list which properties.

9. Is the project area adjacent to a SCDNR State Scenic River? If so, please state which Scenic River and describe how the project may impact the values assigned to the designation and/or how the proposed project adheres to state scenic recommendations. Information on the extent of State Scenic Rivers can be found here: www.dnr.sc.gov/water/river/
10. Is the project area adjacent to a National Estuarine Research Reserve (NERR)? If so, please state which NERR and describe how the project may impact the values assigned to the designation. Information on the NERR's in South Carolina can be accessed at: <https://coast.noaa.gov/nerrs/>.
11. Is the project area adjacent to a state designated Shellfish Area? If so, please provide the coordinates, state if they are commercial or recreational shellfish grounds, and describe how the project may impact these important areas.
12. Please provide as an attachment to this document the following:
- SCDNR Natural Heritage Tool T&E Report
 - Site plan showing all proposed work in the project area
 - Photographs of the project area, including photographs of the varying habitats on site and any significant natural resource features such as wetlands, streams or intact natural forests. Please include captions on the photographs of the date taken and location with coordinates of where it was taken.
