**SUBMISSION FORM**

<b>AGENCY MISSION</b>	The South Carolina Department of Natural Resources' stated purpose is to serve as the principal advocate for, and steward of, South Carolina's natural resources.
-----------------------	---

<b>AGENCY VISION</b>	<p>"South Carolina Department of Natural Resources Vision for the Future". The SCDNR accomplishes its mission based upon an agenda that encompasses these values:</p> <ol style="list-style-type: none"> <li>1. Teamwork – The Agency will accomplish its mission and achieve its vision through goal-focused, cooperative efforts that rely on effective internal and external communication and partnering;</li> <li>2. Integrity – The Agency will lead by example, ensuring that its standards are high, and its actions are fair, accountable, and above reproach;</li> <li>3. Dedication – The Agency will maintain a steadfast commitment to the state's natural resources and its mission;</li> <li>4. Excellence – The Agency will always do its best, and continuously strive to improve its processes, activities, policies, operations, and products; and,</li> <li>5. Service – The Agency will provide quality service that meets the needs and exceeds the expectations of the public and its employees.</li> </ol>

## **AGENCY'S DISCUSSION AND ANALYSIS**

The "Agency's Discussion and Analysis" section requires agency to identify and explain the following two subsections.

I. **Risk Assessment and Mitigation Strategies:** In this subsection, the agency is required to identify the potential most negative impact on the public as a result of the agency's failure in accomplishing its goals and objectives. The agency also should explain the nature and level of outside help it may need to mitigate such negative impact on the public. Lastly, the agency should list three options for what the General Assembly could do to help resolve the issue before it became a crisis.

DNR's Four Main Programmatic Goals are:

Goal 1 - Division of Land, Water & Conservation (LWC)

Develop and Implement programs that study, manage and conserve the State's Land and Water Resources through planning, research, technical assistance, public education and the development of a comprehensive natural resources database.

Goal 2 – Law Enforcement Division (LE)

Conserve and protect the state's natural resources for social, economic, recreational, and commercial benefit while providing maximum human utilization through: (1) the development of public support through outreach, education, and safety programs; (2) the preservation of the peace and protection of human lives and property; and (3) the enforcement of the state's criminal laws through the detection, apprehension, and prosecution of persons who violate those laws.

Goal 3 - Marine Resources Division (MRD)

To sustain the State's living marine resources for the cultural, recreational, commercial and economic benefit of the state's citizens and visitors.

Goal 4 - Wildlife & Freshwater Fisheries (WFF)

Monitor and protect wildlife species and inland aquatic species and their habitats throughout the state and provide recreational hunting and fishing opportunities to the public.

Potentially the most negative impact on the public as a result of the DNR failing to accomplish its goals and objectives would be the lack of accurate and credible science, coupled with credible mechanisms and processes to aid in decision making relating to the utilization and allocation of the state's finite resources. There has been a steady trend of increased pressure on the state's natural resources due to increasing population and business growth, combined with the increased desire and interest in the use of the state's natural resources, both recreationally and commercially. This impact is interwoven

<b>AGENCY NAME:</b>	<b>Department of Natural Resources</b>		
<b>AGENCY CODE:</b>	<b>P240</b>	<b>SECTION:</b>	<b>47</b>

through three distinct areas which are: 1) the sustainability, management and protection of the state’s natural resources; 2) the public’s safety while utilizing the state’s natural resources; and 3) the economic impacts surrounding the protection and use of the state’s natural resources.

Through its four programmatic divisions the DNR is constantly broadening its strategies to address the impacts of population growth, habitat loss, environmental alterations, overuse and other challenges faced in protecting, enhancing, and managing diverse natural resources. This approach is complemented by outreach initiatives with the aim of maintaining continued engagement with constituents, stakeholders and partners. At the same time, the DNR has also expanded all facets of its outreach programs to better educate those who currently are not engaged or knowledgeable about the current impacts on the state’s natural resources.

**Resource Sustainability, Management and Protection**

The use of sound science and technology gives the DNR the ability to anticipate issues in order to better sustain, manage and protect this states precious natural resources. For example, there has been both unprecedented challenges and opportunities facing South Carolina in the form of population growth, particularly along the state’s coastal counties, that are causing significant impacts on the state’s natural resources. DNR’s failure to achieve its goals and objectives would have a profound effect on people, wildlife & marine habitats and species, the environment and economic development. The challenges related to the influx of people to the coast include: the encroachment into what once was wildlife habitat for residential, commercial and industrial uses; more pressure on wildlife and marine resources by recreational and commercial licensees; and greater demands for the use of surface and well water. One of the greatest opportunities presented by this same migration pattern is the creation of jobs and economic opportunity for the state’s citizens, which equates to a better quality of life for the residents of this state. These opportunities do not just come from expansions in business and industry, but also are derived from the over 7,000 individuals and companies that utilize the state’s resources to make a living in commercial fisheries, hunting, fishing, boating and other DNR related statewide outdoor activities that combine for over a \$30 billion impact on this state’s economy.

DNR’s ability to forecast the effects of impacts to the state’s natural resources is paramount to ensuring a better quality of life for the citizens of this State.

**Public Safety**

The primary mission of the DNR law enforcement is to protect the natural resources and those who utilize them. Ultimately, the role of the officer is to gain compliance with the laws; provide information to sportsmen, boaters, and the public; educate resources users; and ensure that the resources are conserved for the enjoyment and use of the public. This past year over 20,000 people participated in hunter and boater education safety outreach programs that promote safety, improve compliance with the laws and regulations, and enhance ethical behavior.

Tasked with the responsibility of managing and protecting the natural resources of the state, DNR is in a unique and challenging position of balancing the ever growing public desire to utilize our natural

<b>AGENCY NAME:</b>	<b>Department of Natural Resources</b>		
<b>AGENCY CODE:</b>	<b>P240</b>	<b>SECTION:</b>	<b>47</b>

resources for recreational and commercial purposes (particularly on the waters of the state), with the requirement to enforce the laws and regulations on the use of the resources to ensure their long-term viability. The proactive educational outreach approach is complimented by a truly balanced enforcement approach. DNR officers are as likely to educate the public regarding a violation through the use of warnings, as they are to bring formal charges. This ratio has remained fairly consistent over time as DNR officers have consistently written approximately 3 warnings for every 1 summons. The law enforcement division's repeated commitment to a proactive approach to public safety, in addition to the enhancement of recreational boating activities, is also exemplified by officers conducting courtesy boat inspections during major holidays and water events. This program has become one of the more effective outreach efforts put in place by the division. These inspections are pre-launch checks of safety equipment and registrations intended to ensure the vessel operator is legal and the watercraft is safe before going on the water. They are conducted by officers and provide another opportunity to deliver the safety message to the public.

DNR's law enforcement's ability to have a continued, pro-active and strong physical presence is vital to the saving of lives, the protection of personal property, and sustaining the state's resources for future generations.

**Economic Development**

SCDNR is an integral part of this state's economy. There are a myriad of economic impacts surrounding the protection and use of the state's natural resources. The proper, responsible and sustainable use of South Carolina's natural resources are critical to supporting and promoting businesses already located in the state; future economic development recruitment to the state; and tourism that draws outside sources of revenue to South Carolina.

Over the recent years, water-related issues have dominated the headlines with increasing public and political attention. South Carolina currently has limited scientific information about the future demands on and availability of our water supply. As the water resource planning agency for the state, the DNR is responsible for monitoring and analyzing water resource information and developing state water plans. The General Assembly allocated \$1.5 million to complement South Carolina's new surface water permitting program administered by SC Department of Health and Environmental Control (DHEC), and to gather the information necessary to update the State Water Plan developed by DNR. The two agencies are in the process of gathering data on South Carolina's eight basins: Broad, Catawba, Edisto, Pee Dee, Salkehatchie, Saluda, Santee, and Savannah to build surface water quantity models capable of: accounting for inflows and outflows from a basin; accurately simulating stream flows and reservoir levels over the historical inflow record; and conducting "What if" scenarios to evaluate future water demands, management strategies and system performance. Once they are built and accepted by DNR/DHEC, the models will be made available for use by water utilities, energy producers, river basin organizations, and other stakeholders. The surface water models, and other available tools, can be used to support development of regional water plans.

A properly implemented water plan supported by these surface water models will provide for the inclusion of natural resource impacts alongside economic considerations. This information can be used

<b>AGENCY NAME:</b>	<b>Department of Natural Resources</b>		
<b>AGENCY CODE:</b>	<b>P240</b>	<b>SECTION:</b>	<b>47</b>

to support existing industries and allow for the expansion of new industries, with a firm understanding of their natural resource impacts. The ability of SCDNR to conduct these activities has not been optimized due to limitations for long term funding options.

Another major role in the DNR's contribution to the state's economic development is the DNR's environmental programs section which facilitates the permitting of major economic development projects, which include mitigation for unavoidable impacts to streams and wetlands. This role is not only about the ability of the DNR to aid in the production of viable mitigation plans, it is just as critical that the DNR have the resources in order to help produce viable plans in a timely manner. Simply put, if there is no viable mitigation plan or if a plan cannot be produced within prescribed timeframes for the key decision makers, major economic development projects and their associated jobs can be lost.

The final and largest piece to SCDNR's positive economic impact to the state is hunting, fishing, boating and outdoor related activities, which includes non-residents that draws outside sources of revenue to South Carolina. As stated earlier, commercial fisheries, hunting, fishing, boating and other DNR related statewide outdoor activities combine for over a \$30 billion impact on this state's economy. As an additional footnote, DNR sold over 186,000 fishing and hunting privileges to non-residents this past fiscal year. Beyond the non-resident license revenues that benefit all the resident sportsman of the state, these non-resident sportsmen add to the state's economy through sales & use taxes, gas taxes and property leases. The quality of the sporting experience supported by the DNR's management and protection efforts, annually creates over 175,000 ambassadors who promote South Carolina by sharing their positive experiences with our future non-resident sportsmen.

If the DNR cannot meet its Land & Water goals and objectives, the state would lack the effective tools and consolidated hydrologic data to provide reliable scientific information to decision makers in water resource planning. The potential negative impacts could include: degradation of wildlife habitat; loss of species; fish kills; a resulting reduction in recreation and tourism; a reduction in agricultural production, a reduction in hydropower production, interruption of manufacturing and industrial processes, the depletion of groundwater; surface water shortages; and a reduced capability to respond to drought conditions.

The state's support for the DNR to fulfill the strategies supporting these objective needs to continue to be a state priority so that the state's interest carried out by DNR are not compromised.

**Information Technology**

The major goals and objectives of the DNR are dependent on a unique, broad and intertwined information technology infrastructure that supports a variety of application needs that share data and is hosted on a common technology interface. In addition to the normal IT business requirements of a state agency, DNR's IT infrastructure supports the needs of the sciences (ex: meteorology, hydrology, geology, GIS, flood mapping, wildlife & marine), large volumes of data monitoring and analysis, a law enforcement ticketing and tracking system, and a boat titling / registration system that is coupled with a license system, which includes a state-wide network of license vendors that issues over a million privileges a year. This IT framework is critical to the success of the agency's goals and objectives.

<b>AGENCY CODE:</b>	<b>P240</b>	<b>SECTION:</b>	<b>47</b>

The General Assembly can help resolve the aforementioned issues before the state/DNR faces a crisis by:

- 1) Continuing to invest resources with the DNR which will allow the agency to carry on with research and investigations on the potential challenges and opportunities in natural resource decision making process. This will allow the DNR to anticipate problems and issues relating to natural resource allocations and management, and propose options in the form, of workable solutions in advance of challenges and threats;
  
- 2) Continue to support the department in maintaining an adequate, professional and well trained workforce. On a day-to-day basis, the wide ranging mission of the DNR requires broad scopes for DNR's staff roles and responsibilities. These roles constantly integrate and overlap in order to meet the agencies responsibilities, goals and objectives. This professional synergy was never more evident than during the historic flood of 2015, in which all sections of the DNR were fully engaged in serving the citizens of the state and protecting our natural resources. Those roles included: weather forecast from the State Meteorologist & staff; DNR Law Enforcement preparation and logistics with the Emergency Preparedness Division; DNR Law Enforcement's public safety roles of search, rescue & patrol; Flood Mitigation Field work in advance of FEMA arrival, as well as FEMA coordination in the floods aftermath; Engineering staff assessing a variety of water structures across the state; and Wildlife staff coordinating the assessment of the floods impacts on habitat and species and establishing temporary hunting closures; and
  
- 3) Providing the resources to the DNR to maintain modern, secure, well-integrated information systems, and technology throughout the agency due to the complexity and broad areas that the DNR covers. This will also make interacting with the DNR easier for the DNR's customers and constituents.

Sum of number of wells measured for use in development of potentiometric map.	1.1.6
19	Expand information available from LWC Division webpages with use of story maps to disseminate natural resource information	Develop at least one StoryMap and make available through DNR website.	StoryMap developed for Oct. 2015 Flooding.	Continue developing StoryMaps for communicating information.	7/1/2015 - 6/30/2016	StoryMap available through SCDNR website.	Count the number of StoryMaps that were published and made available to the public through the SCDNR Website.	1.1.7
20	Increase use of digitally interactive maps to provide additional information to support aspects of natural resource information	Develop interactive maps that can be shown to improve access to information.	Hydrology: Well Locator Map, Stream Gage Workshop Map. Geology: Recent Earthquakes Map.	Continue to find ways to improve information access through web maps.	7/1/2015 - 6/30/2016	Web maps available through SCDNR website, SC Geological Survey website.	Review the web traffic statistics and analyze the results of a questionnaire on the SC Geological Survey website.	1.1.7

21	Expand use of digital-mapping in field work done by LWC Division	Evaluate and implement use of iPad and field collection applications	Evaluated ArcGIS Collector, ArcGIS Survey 123 for field data collection. Developed database and workflow for ArcGIS Collector for geologic data collection.	Implement ArcGIS Collector for iPad workflow with geologists.	7/1/2015 - 6/30/2016	Data collected are used to produce geologic maps, available through SC Geological Survey website.	Document the progress of I-Pad mapping. Evaluate the utility of data-collector applications and improve as needed. Design workflow for standardized transfer of digital map data into ESRI ArcGIS geodatabases and development of final map products.	1.1.7
22	Evaluate uses of drones to digitally collect natural resource information	Synthesize information gathered from internal evaluation and external research.	Wrote a document and presentation outlining the potential benefits. Communicated with other SCDNR divisions and with MRD staff, reviewed the current regulatory environment for SC Drones.	Continue to monitor regulatory environment for drone use, and find examples of natural resource agencies using drones.	7/1/2015 - 6/30/2016	Presentations and documents are available.	Continue collecting background information: methods, applications, results, and impediments to work. Document. Until FAA rules change, SCDNR operations are not possible, but new regulations are in development that could allow SCDNR to participate.	1.1.7
23	Begin to integrate available onshore maps with offshore information of Long Bay area to produce composite working map	GIS database design, GIS workflow, geologic interpretation	Database design and data integration with university researchers accomplished.	Continue to develop GIS workflow and design map product.	7/1/2015 - 6/30/2016	Map products will be available through SC Geological Survey website.	Using results of onshore 1:24k-scale geologic map and offshore geologic interpretations, integrate with low-frequency GPR studies in the Myrtle Beach area and produce seamless geologic maps from on- to offshore showing locations of paleochannels and potential sand resources offshore.	1.1.7

11	12-28-2730	State	Statute	<p>Authorizes the Department to receive one percent of the proceeds from thirteen cents of the gasoline user fee imposed, pursuant to the chapter on Motor Fuels Subject to User Fees, for a special water recreational resources fund of the State. All balances in the fund must be carried forward annually so that no part of it reverts to any other fund. The fund must be apportioned based upon the number of registered boats or other watercraft in each county and expended by the Department to acquire, create, or improve water recreational resources. As used in this section, "water recreational resources" means public waters which are naturally occurring or which provide habitat for fish, aquatic animals, or waterfowl and which must provide public recreational opportunities. These funds may be used to promote activities that take place on the water for recreation provided that no more than ten percent of each annual allocation may be used for this purpose beginning July 1, 2003. Each county delegation may make recommendations to the Department for projects to acquire, create, or improve water recreational resources. The Department must give these recommendations primary consideration over any other projects. The Department is authorized to use up to one-third of the funds for law enforcement, noxious aquatic weed control, and acquisition. The Department must be reimbursed for design and engineering costs and administration of this section from the funds collected under the provisions of this section. The Department must dispose of all surplus property owned by the Department or subject to its custody and control for purposes of disposal in the manner provided by law for the disposition of surplus state property. All proceeds from the sale of the Department's surplus property that was originally purchased with a county's water recreational resources funds must be returned to the county that originally purchased the property and placed in that county's water recreational resources fund. Beginning with property purchased during fiscal year 2000, the Department must provide the legislative delegations of each county with an annual inventory of all property purchased with the county's water recreational resources funds on or before the beginning of the next ensuing session of the General Assembly.</p>	I. 63	48-9-810	State	Statute	The Department is authorized to receive petitions for including additional territory within an existing district and the proceedings provided for in Article 5 of this chapter in the case of petitions to organize a district shall be observed in the case of petitions for such inclusion. The Department shall prescribe the form for such petition, which shall be as nearly as may be in the form prescribed in Article 5 of this chapter for petitions to organize a district.	II.G Land, Water & Conservation
64	48-9-820	State	Statute	The Department may accept a petition for subdivision of a district. A petition signed by a majority of the members of the governing body of the soil and water conservation district or a petition signed by twenty-five landowners of the county or counties wishing to withdraw and constitute themselves a separate district may be filed with the Department asking that the subdivision be made and constitute a district. Such petition shall (a) set forth the name of the district, (b) describe the existing boundary lines of the district and boundary lines of the proposed district (subdivision) and (c) request that the department hold a public hearing upon the question of the proposed subdivision and that the Department duly define the boundary lines as set out in the petition.	II.G Land, Water & Conservation
65	48-9-830	State	Statute	Within thirty days after such a petition has been filed with the Department, it shall cause due notice to be given of a proposed hearing upon the question of the proposed subdivision.	I. Administration II.G Land, Water & Conservation
66	48-9-840	State	Statute	After such hearing the Department shall determine, upon the facts presented at such hearing and upon such other relevant facts and information as may be available, whether there is need in the interest of the public health, safety and welfare for the proposed subdivision and whether the operation of the districts within the proposed boundaries will be administratively practicable and feasible. In making such determination, the Department shall give due weight and consideration to the legislative determinations set forth in Section 48-9-20 and to the standards provided in Sections 48-9-560 and 48-9-600 for the guidance of the department in making its determinations in connection with the organization of districts. If the Department determines that the proposed subdivision is not necessary in the interest of the public health, safety and welfare, or that the operation of the districts within the proposed boundaries would not be administratively practicable or feasible, it shall record such determination and deny the petition. If the Department shall determine in favor of the proposed subdivision, it shall record such determination and define the boundary lines between the districts and shall notify the chairman of the governing body of the district to be divided of its determination.	II.G Land, Water & Conservation
67	48-9-850	State	Statute	The Department shall then proceed in accordance with Sections 48-9-610 to 48-9-630 to organize the subdivision into a district and to inform the Secretary of State of the change in the boundaries of the remaining district and to complete the organization of the governing body of the remaining district. (B) The Department shall provide available information on water demands and use to any significant water user, public or private, in order to promote voluntary water conservation. (C) The Department may promulgate regulations to specify categories of nonessential water use and other terms necessary to implement this section. The Department by regulation may provide for the mandatory curtailment of nonessential water uses during periods of severe or extreme drought in drought management areas. Following the determination, the Department shall issue a declaration specifying the drought management areas affected and identifying the categories of nonessential water use to be curtailed. The declaration must be widely distributed to news media and must be published at least once a week in a newspaper of general circulation in each county affected. Any person adversely affected by mitigation or mandatory curtailment may, within ten days after such curtailment becomes effective, submit appropriate information to the Department and obtain relief therefrom as is appropriate. Any declaration shall continue in effect only so long as conditions in a drought management area reasonably require it, and the declaration must be terminated by action of either the Drought Response Committee or the Department, and notice of termination of the declaration must be given as when originally issued. (D) During any drought alert phase, the Department may offer its services to mediate any dispute arising from competing demands for water. The mediation may be undertaken only upon the request of the parties involved and may not be binding. A mediation shall not stop or preclude the Department and the Drought Response Committee from taking any other action authorized by this chapter.	II.G Land, Water & Conservation
115	49-23-90	State	Statute	The Department is authorized to prepare and distribute a model drought response ordinance or plan, accept for review proposed ordinances or plans or a changes to an ordinance or plan in order to determine that it complies with the State Drought Response Plan. 127	49-29-110	State	Statute	Establishes the Scenic Rivers Trust Fund which the Department is authorized to administer for the purpose of acquiring fee simple or lesser interest in land adjacent to scenic rivers and river segments, legal fees, appraisals, surveys, or other costs involved in the acquisition of those interests. The fund also may be utilized for educational or planning projects associated with the administration and management of the State Scenic Rivers Program. Unexpended balances, including interest derived from the fund, must be carried forward each year and used for the purposes provided in the South Carolina Scenic Rivers Act. No fund money may be expended to acquire an interest in land by eminent domain nor may the funds be expended to acquire interest in land without a recommendation from the Board and the approval of the State Fiscal Accountability Authority or Department of Administration, as applicable. The Board is authorized to report by letter to the presiding officers of the General Assembly and chairmen of the House and Senate Agriculture and Natural Resources Committees each year all funds expended pursuant to this chapter for the previous year, including the amount of funds expended and the uses to which the expenditures were applied. The fund is eligible to receive appropriations of state general funds, federal funds, donations, gifts, bond issue receipts, securities, and other monetary instruments of value. A reimbursement for monies expended from this fund must be deposited in this fund. A fund received through sale, exchange, or otherwise of land acquired under this chapter accrues to the fund.	I. 128	49-29-160	State	Statute	The Department is required to formulate comprehensive water and related land use plans for the three classes of scenic rivers. Each plan must address access of electricity, natural gas, and communication lines or other facilities for permitted uses for each class of river facilities. Each plan must also address criteria for permitting the crossing of each class of scenic river by sellers of electric energy, natural gas, or communication services. In developing these criteria, the Department must consider the state of available technology, the economics of the various alternatives, and that electric, natural gas, and communication suppliers are required to deliver their services. The Department must recognize that emergency situations will arise that require immediate action and must make provision in the management plan to allow this action.	I. Administration II.G Land, Water & Conservation
129	49-29-170	State	Statute	Sellers of electric energy, natural gas, or communication services may cross on, over, or under lands designated as part of the Scenic River System provided that the Department certifies that such crossing is consistent with the management plan for those lands. A certificate of consistency shall be issued by the Department upon a finding: (1) that the crossing is necessary to provide electric, natural gas, or communication service; and either (a) that the crossing is consistent with the management plan; or (b) that the extent of deviation from the management plan for the construction, operation, and maintenance of the facility across the scenic river is justified, considering the state of available technology and the nature and economics of the various alternatives, and that the entity responsible for the encroachment will make reasonable mitigation for the impacts caused by the construction, operation, and maintenance of the facility. The Department shall issue a certification of consistency or nonconsistency within thirty days from the receipt of an application. 396	50-15-500	State	Statute	Authorizes the Department to establish an alligator management program. (B)(1) The Department must establish an alligator management program that allows for hunting and for selective removal of alligators in order to provide for the sound management of the animals and to ensure the continued viability of the species. The Department must set the conditions for taking, including the size, methods of take, areas, times and seasons, disposition of the parts, and other conditions to properly control the harvest of alligators and the disposition of parts. The Department may allow alligators to be taken at any time of the year, in any area, including sanctuaries, as part of its alligator management program. All alligators taken under the alligator management program must be taken pursuant to permits and tags and under conditions established by the Department in accordance with state and federal law. (2) The Department may establish an alligator hunting season. The Department may issue alligator permits and tags to allow hunting and taking of alligators in any game zone where alligators occur. A person desiring to hunt and take alligators must apply to the Department. (3) A landowner or lessee of property on which alligators occur may apply to the Department for a permit to participate in the Private Lands Alligator Program. (4) The Department may designate alligator control agents who demonstrate by training and experience that they possess the skills to remove alligators. Those persons designated serve at the discretion of the Department. The Department may require periodic demonstrations of skill or require periodic training. Alligator control agents function under the general guidance and supervision of the Department for the capture and removal of nuisance alligators including the disposition of the alligator or its parts.
