

Scott Creek Research Project – Results and Implications
February 6, 2007
6:00pm at Edisto Interpretive Center

South Carolina Department of Natural Resources staff and partners have been researching the hydrologic, geologic, and biological nature of Scott Creek for the past three years. This symposium will allow the researchers to present their results of the study and discuss the implications of opening the Scott Creek causeway to water flow.

Presenters include:

Dr. Straud Armstrong - Hydrological Study of Scott Creek

Dr. Danny Gustafson - Biological Inventory of Scott Creek

Mr. Anton Dumars - Sedimentation Studies in Scott Creek
