South Carolina Department of Natural Resources
State Lakes Program

The South Carolina Department of Natural Resources State Lakes Program is designed to provide fishing to the public in areas of the state where the opportunity is lacking or where there are few public fishing lakes. This program provides over 1,500 acres of public fishing in South Carolina.

Proper lake management provides quality fishing for a variety of popular game fish species including largemouth bass, bluegill and shellcracker. In addition to these species, the department has also stocked large numbers of channel catfish. This trophy fish combines good "fishing" qualities with excellent table fare.

The SCDNR State Lakes provide anglers the opportunity to fish from the bank, a pier and even a boat in some locations.

The South Carolina Department of Natural Resources hopes that every visitor to a State Lake has the opportunity to enjoy the fun and relaxation fishing provides.

Lake Edgar Brown
Barnwell County

Lake Edgar Brown is a 100-acre lake providing fishing for largemouth bass, bluegill, shellcracker and channel catfish. A portion of the lake is used for boating and water skiing. Lake Edgar Brown offers a boat ramp, fishing pier and is handicap accessible. The lake is open to fishing 24 hours a day. The lake is open for other allowed purposes from one-half hour before official sunrise until one-half hour after official sunset.

Fishing Rules & Regulations

1. Fishing is allowed with only rod and reels or poles. The statewide limit on the number of these devices applies.

2. Vehicles are restricted to roads and designated access areas only. No motorized vehicles of any type allowed on dikes.

3. Trails are for walking or fishing access only; no ATVs, motorized vehicles, or horses allowed on these trails.

4. Pets must be on leashes or under the control of their owner at all times.

5. Motor powered boats are allowed. Only outboard motors rated at 10 horsepower or less are allowed north of Wellington Road.

6. The possession or consumption of alcoholic beverages is prohibited on department lake properties, except as by special permit from the department.

Lake Paul Wallace

*Malboro County*

Lake Paul Wallace is a 300-acre fertilized lake providing fishing for bluegill, shellcracker and channel catfish. The fishing side of the lake is open to boats with motors 10 horsepower or less only. The boating side of the lake (west of the earthen dike) allows for boats and waterskiing. Note all boat traffic must follow a counter-clockwise route of travel. Adjacent to the lake is a diversion canal that also offers fishing, boating and water skiing. The lake offers a boat ramp, fishing pier and picnic area. The lake is open to fishing 24 hours a day. The lake is open for other allowed purposes from one-half hour before official sunrise until one-half hour after official sunset.

**Fishing Rules & Regulations**

1. Fishing is allowed with only rod and reels or poles. The statewide limit on the number of these devices applies.
2. No minnows allowed for bait.
3. Vehicles are restricted to roads and designated access areas only.
4. Trails are for walking or fishing access only, no ATVs, motorized vehicles, or horses allowed on these trails.
5. Pets must be on leashes or under the control of their owner at all times.
6. The possession or consumption of alcoholic beverages is prohibited on department lake properties, except as by special permit from the department.
7. Lake may be closed for special use activities by special permit of the department.
8. Lake Wallace Fishing Side (East of the earthen dike that separates the two lake portions)
   - Boats are allowed, but may only be propelled by paddle, electric trolling motors or outboard motors rated at 10 horsepower or less.
9. Lake Wallace Boating Side (West of the earthen dike which separates the two lake portions)
   - Boats and water skiing are allowed and must follow a counter-clockwise route of travel.
   - Jet Ski or personal watercraft are allowed but not within 200 feet of boats.
   - All other South Carolina watercraft rules and regulations apply.

How do I get there?

- From Bennettsville, travel northeast on E Main Street towards Marlboro Street for 0.5 miles. Turn left onto N Cook Street/SC 385. Travel 1.9 miles and turn left onto Beauty Spot Road (S-35-47). Travel 0.5 miles and park along the dirt area just off the roadside.

- From Bennettsville, travel northeast on E Main Street towards Marlboro Street for 0.5 miles. Turn left onto N Cook Street/SC 385 and travel 0.6 miles. Turn left onto Country Club Drive (S-35-220). Travel 0.3 miles and the parking for access will be on your right.

- From Bennettsville, travel northeast on E Main Street towards Marlboro Street for 0.5 miles. Turn left onto N Cook Street/SC 385 and travel 1.1 miles. Turn left onto Wallace Road (S-35-17) and in approximately 150 feet turn left into parking area.
Lake Edwin B. Johnson is a 40-acre lake, located at the end of SC State Road 359 off SC State Road 295 between Spartanburg and Pacolet, providing fishing for largemouth bass, shellcracker and channel catfish. The lake is open one-half hour before official sunrise until one-half hour after official sunset seven days a week.

**Fishing Rules & Regulations**

1. Fishing is allowed with only rod and reels or poles. The statewide limit on the number of these devices applies.
2. No minnows allowed for bait.
3. Trails are for walking or fishing access only; no ATVs, motorized vehicles, or horses allowed on these trails.
4. Pets must be on leashes or under the control of their owner at all times.
5. Boats are allowed, but may only be propelled by paddle or electric trolling motors.
6. The possession or consumption of alcoholic beverages is prohibited on department lake properties, except as by special permit from the department.

How do I get there?

- From Spartanburg, take Hwy 295 east about 3 miles to the Town of Whitestone. Turn right at the Lake Edwin Johnson sign. This is Lake Johnson Road, continue to follow where it dead ends at the lake.
Jonesville Reservoir 25 acres provide fishing for largemouth bass, bluegill, shellcracker and channel catfish. The lake offers a fishing pier, boat ramp, picnic area and is handicap accessible. The lake is open on Monday, Wednesday and Saturday only, from one-half hour before official sunrise to one-half hour after official sunset.

**Fishing Rules & Regulations**

1. Fishing is allowed with only rod and reels or poles. The statewide limit on the number of these devices applies.
2. No minnows allowed for bait.
3. Trails are for walking or fishing access only; no ATVs, motorized vehicles, or horses allowed on these trails.
4. Pets must be on leashes or under the control of their owner at all times.
5. Boats are allowed, but may only be propelled by paddle or electric trolling motors.
6. The possession or consumption of alcoholic beverages is prohibited on department lake properties, except as by special permit from the department.

How do I get there?
- From Jonesville, take Hwy 18/Pacolet Street towards Gaffney for approximately 1 mile. Turn left onto Reservoir Road and continue to end.
Lake John D. Long

Union County

Lake John D. Long is an 80-acre fertilized lake providing fishing for largemouth bass, bluegill, shellcracker and channel catfish. The lake offers a boat ramp, fishing pier and is handicap accessible. The lake is open from one-half hour before official sunrise until one-half hour after official sunset.

Fishing Rules & Regulations

1. Fishing is allowed with only rod and reels or poles. The statewide limit on the number of these devices applies.
2. Vehicles are restricted to roads and designated access areas only.
3. Trails are for walking or fishing access only; no ATVs, motorized vehicles, or horses allowed on these trails.
4. Pets must be on leashes or under the control of their owner at all times.
5. No minnows allowed for bait.
6. Boats are allowed, but may only be propelled by paddle or electric trolling motors.
7. The possession or consumption of alcoholic beverages is prohibited on department lake properties, except as by special permit from the department.

How do I get there?
- From Lockhart, take Hwy 49/Woodside Drive towards Union for 2.6 miles. Turn right on John D Long Lake Road. Other access can be reached by leaving John D Long Lake Road and turning left onto SC Hwy 49. Travel 0.2 miles and take a slight left onto SC Hwy 105. Travel 1.9 miles and turn left onto SC Hwy 9. Travel on Hwy 9 for 2.2 miles to a left on Black Bottom Road. Continue to follow Black Bottom Road by veering at curve to the right. Lake at the end.
Draper WMA Lakes
York County

Draper WMA State Lakes are three fishing lakes totaling eight acres, all of which offer fishing for largemouth bass, bluegill, shellcracker and channel catfish. The lakes vary in size with the smallest at one acre and the largest at five acres. Daily creel limits are combined for all ponds. Lakes open for fishing from one-half hour before official sunrise to one-half hour after official sunset, every day except Tuesday. The ponds are closed to fishing on Tuesdays.

Fishing Rules & Regulations

1. Fishing is allowed with only rod and reels or poles. The statewide limit on the number of these devices applies.

2. No minnows allowed for bait.

3. Trails are for walking or fishing access only; no ATVs, motorized vehicles, or horses allowed on these trails.

4. Pets must be on leashes or under the control of their owner at all times.

5. No boats are allowed in ponds.

6. The possession or consumption of alcoholic beverages is prohibited on department lake properties, except as by special permit from the department.

How do I get there?

- From McConnells, travel 2.5 miles on SC Hwy 322 E/McConnels Hwy. Turn right onto Brattonsville Road (State Road S-46-165). Travel 0.6 miles and take the first right onto Draper Road.
Why do we have Rules & Regulations? People! Along with natural pressures such as predators and competition for food and space, fish have to worry about pressures we put on them. Those pressures include pollution, in the forms of litter and runoff which damages water quality; loss of adequate habitat due to changes in the landscape such as urban development and farm practices; and overfishing which comes from the unnecessary harvest of too many fish or from harvesting fish that are too small and haven’t had the opportunity to reproduce. SCDNR's role is to protect and manage the resource through science and provide suggestions to the legislature on necessary laws. The General Assembly then votes to make the bills law and SCDNR law enforcement officers enforce these laws. Some of the common management practices include daily bag or creel limits on the amount of fish an angler can catch and possess in a day, slot or size limits on fish to allow fish to reach sexual maturity and reproduce and restrictions on what type of gear can be used to harvest or catch certain fish—game versus non-game.

Frequently Asked Questions about Fishing Regulations

Where do I find fish and wildlife regulations for the state of South Carolina?
- Rules and Regulations are available at every license vendor in the state. They are also found on the website at www.dnr.sc.gov/regulations.

What age do I need to purchase a fishing license?
- When you turn 16, you must have a fishing license in order to fish legally in public waters.

How often do I need to renew my fishing license?
- A fishing license is valid 1 year from the date of purchase.

Do I need a fishing license to fish from my private property?
- Yes, you will need a license to fish in public waters (such as lakes or rivers) even if you’re on private land. You don’t need a license to fish on private property in a private pond unless you are fishing in a commercial pay pond. You don’t need a license to fish in a commercial pay pond when the pond is permitted by SCDNR.
Angler Recognition Program

Did you land the catch of a lifetime? SCDNR wants to recognize your outstanding freshwater accomplishment.

The Angler Recognition Program focuses on trophy sized catches of blue catfish, brown trout, crappie (both white and black), largemouth bass and striped bass. The program not only allows SCDNR to recognize an angler’s significant trophy catch, but also provides SCDNR with information that will be valuable to SCDNR fisheries biologists for the management of these important species. This program does not replace the State Records Program, but rather allows the catch of other big fish to be recognized.

**Eligible Fish**

- Any fish caught in a public water body may be submitted for recognition. This excludes private ponds and commercial pay ponds.
- Fish entry must be caught on standard sport fishing tackle; rod, reel and line or pole and line. Entry must be hooked and played by one person only.
- The tackle used must be standard and available commercially.
- The catch must be made in accordance with any laws or regulations governing the species and/or water body from which it was caught.
- To be recognized the fish must either meet the length or weight minimum listed below for the adult or youth categories.

How to Certify Your Catch

Step 1: Measure your catch
- Tip of snout with mouth closed to tip of tail (excluding filaments). Tail should be pinched. All freshwater fish species in the state of South Carolina are measured using total length.
- A side view photograph along a ruler or tape measure is required for each entry.
- The measurement of the fish must be for the total length of the fish with head and tailfin intact.
- The measurement of the fish must be in the presence of a witness at least 18 years of age.

Step 2: Weigh your catch
- No estimated weights will be acceptable. Fish entry must be weighed on a certified scale of known accuracy in the presence of a witness at least 18 years old. (Most grocery stores have certified scales). You may be asked to prove the accuracy of the scales used.

Step 3: Complete your paperwork
- A completed affidavit is required for all entries which can be found online at www.dnr.sc.gov/fishaward.
- A signed waiver for the use of the photo, if desired, on Facebook and SCDNR publications.
Awards for Anglers

Each award recipient will receive a certificate that features the artwork of Pamela Corwin, DNR Biologist and Nature Artist.

There are different levels of recognition available. See the listing of what you could earn!

Mac Kimbrell 8 pound Largemouth Bass
State Records Program

It’s a once in a lifetime catch that beats all the others and we want to recognize you as the angler for that catch.

If you think you have caught a fish that may break the state record for that species, please visit our website at www.dnr.sc.gov/fish/fishrecs/records to view the current state records and download an affidavit for recording your catch within 45 days of landing the monster fish!

Records are kept for the following species: striped bass, white bass, hybrid bass and white perch, largemouth bass, spotted bass, smallmouth bass, redeye bass, bluegill (bream), redear sunfish (shellcracker), redbreast sunfish, warmouth, flier, pumpkinseed, white and black crappie, brook trout, brown trout and rainbow trout, sauger, yellow perch and walleye, chain picker (jackfish), blue catfish, bullhead catfish, channel catfish, flathead catfish and white catfish, bowfin (mudfish) and American shad.

You will need to weigh the fish on certified scales and have two witnesses present. Information on the fish’s weight, location caught and how the fish was caught will need to be provided.

Rules for Entering and Registering Your State Record Catch

1. Fish entry must be caught on standard sport fishing tackle; rod, reel and line or pole and line. Entry must be hooked and played by one person only.

2. Records are maintained on “all tackle” records only. Line size and angling device used are not considerations for “all tackle” records, only that the tackle must be standard and available commercially.

3. The catch must be made in accordance with any laws or regulations governing the species and/or water body from which it was caught.

4. No fish caught from any hatchery nor aquaculture facility is eligible.

5. No estimated weights acceptable for registration. Fish entry must be weighed on scales of known accuracy in the presence of two witnesses at least 18 years old. (Most grocery stores have certified scales.) You may be asked to prove the accuracy of the scales used.

6. To replace an existing record fish weighing less than 25 pounds, the replacement, must weigh a minimum of 2.0 ounces (1/10th pound/57 grams) more than the existing record, otherwise the entry will be considered a tie and the applicant listed as a co-holder of that record. Entries to replace a fish greater than 25 pounds must weigh a minimum of 8.0 ounces (5/10th pound; 266 grams) more than the existing record, otherwise the entry will be considered a tie and the applicant listed as a co-holder of that record.
7. Because of technicalities, a South Carolina Department of Natural Resources fisheries biologist must identify all entries as to the species. If possible, the biologist should also witness the weighing of the entry. In the event a biologist is not readily available, the entry should first be weighed, measured and witnessed, then frozen or otherwise preserved intact until a biologist is notified. The verifying biologist’s decision is final and the South Carolina Department of Natural Resources reserves the right to refuse the registration of any questionable entry.

Terry McConnell, Lake Hartwell 63 pounds 4 oz.; State record caught in 2009
Aquatic Education Programs

The Aquatic Education Section of SCDNR offers FREE education programs on recreational fishing techniques, opportunities and angler ethics. Here are some of the unique, fun fishing and learning opportunities available.

**Certified DNR Fishing Instructor Program**

SCDNR is always on the lookout for avid anglers who would like to share their passion for fishing with families and make a difference in young lives. To become a Certified DNR Fishing Instructor, you have to attend the training, pass a background check. Once certified, you can begin sharing that joy of fishing with others by leading your own SCDNR supported Family Fishing Clinics.

**Family Fishing Clinics**

Family Fishing Clinics are an introductory class to fishing. Families with kids ages 4 and up can learn how to tie fishing knots, rig a rod and reel, cast and try their hand at fishing.

**Fishing Tackle Loaner Program**

The tackle loaner program has sites all around the state in various state and county parks that allow adults, kids and families to try their hand at fishing. Checking out a rod, reel and tackle is free. Bring your own bait and pay the park entry fee and the fishing fun is free!

**Reel Art**

A component of the SC Reel Kids program, the Reel Art program is an art competition for kids in kindergarten through 12th grade. Kids learn about fish and their habitats while creating their fun, creative fish art. Deadline for the competition is March 1st of each year.

**Youth Bass Fishing Clubs**

SCDNR, The Bass Federation of SC and B.A.S.S. have teamed up to help bring youth bass fishing clubs to schools around the state. Students can establish school bass fishing clubs to compete for prizes, scholarships and more on a club, state and national level.

To learn more about these education programs, visit [www.dnr.sc.gov/aquaticed](http://www.dnr.sc.gov/aquaticed) for more information or call 803-737-8483 or email aquaticed@dnr.sc.gov.
Catch & Release or Catch & Keep

Catch & Release

Currently, many fish species of popular game fish have legally mandated size and catch limits, requiring anglers to release undersized and over the limit fish. Many anglers voluntarily release their fish. If these fish are not released properly, their chance of survival is reduced.

Whether anglers choose to release fish or are required to do so by law, all released fish should be handled carefully to give the fish the best chance for survival. When practicing catch and release fishing, you should do the following:

- Use barbless or circle hooks and needle nose pliers or forceps to reduce injury and handling time of the fish.
- Land the fish as quickly as possible to minimize the fish’s fighting time.
- Use wet hands when handling a fish and minimize the fish’s time out of the water.
- Never hold a fish by the gills.
- When returning a fish to the water, point the fish into the current or cradle it in your hands loosely under the water until the fish swims away on its own.
- If a fish is landed and the hook has been swallowed, cut the line as far down in the fish’s mouth as possible. Do NOT pull the hook out!

Catch & Keep

Most of the game fish species are excellent fare for the frying pan or grill. If fishing to keep, make sure you follow all rules and regulations with regards to size and catch limits. Keep only fish you will use and release the rest. Plan ahead and bring a proper storage container to put the fish on ice or in water. Get fish cleaned as soon as possible and enjoy! Bon appetite!
Invasive Species

Invasive or aquatic nuisance species are non-native organisms that lack natural predators or diseases that help keep their growth in check. Some of the common invasive plants in South Carolina include hydrilla, water hyacinth, giant salvinia, water primrose, phragmites and alligator weed. These plants grow very dense, covering large areas, degrading water quality, displacing native plant species and making recreation and boating impossible. Preventing the occurrence of these invasive species can save millions of public and private dollars in control costs. South Carolina law also includes fines up to $500 and/or imprisonment for persons spreading nuisance aquatic weeds.

Anglers should also be aware of unnoticed passengers on their boats and/or waders and take the necessary precautions to assure they are not spreading harmful exotic animal hitchhikers from one stream to another. A few of the invasive animals include green mussels, zebra mussels, mud snails, flathead catfish, spotted bass, Asian carp and lionfish. The larvae (immature form) of animals can be so tiny that they are not visible to the naked eye. These animal larvae can live in mud, dirt, sand and on plant fragments. Therefore, anglers should always remove visible mud, sand, plants or plant fragments from their boats, wading gear, clothing and fishing equipment before leaving a water body. Do not transport any potential hitchhikers, even back to your home. Remove and leave them at the water body.

To avoid further damage from exotic species, anglers should never take resource management into their own hands. Unplanned stocking of fish, other aquatic animals or plants by anglers can disrupt the natural balance in an aquatic ecosystem causing damage to the established fishery, fish habitat and prey base. Unplanned stockings often occur from the careless use of live baits. Excess live bait, whether purchased at a local bait store or obtained from another body of water, should not be released. It may be disposed of in a trash receptacle or your personal compost heap. Even if you think your live bait is native, it has the potential to house nuisance species and disease that can have negative impacts on aquatic ecosystems. Dispose of shrimp parts and oyster shells properly. Shrimp heads and shells need to be disposed of in the trash and not thrown into the water because non-native shrimp parts have the potential to spread disease. Oyster shells can be taken to a nearby oyster recycling facility.

Harmful exotics such as Whirling Disease spores, Didymo algae, zebra mussels, mud snails, Asian clams and many more are becoming more common threats to aquatic resources.

Anglers should thoroughly clean their boats and wading gear after each use!
Ways to Clean Wading Gear

- Once wading gear is 100% dry, allow it to remain dry for 5 days before using again.

- Another option is to dip wading gear in a 3% bleach solution, rinse well (as chlorine can be harmful to gear) and allow to dry thoroughly. To avoid possible damage from chlorine, anglers can dip their gear in a 100% vinegar solution for 20 minutes or in a 1% salt solution for 20 minutes. Don’t forget your best fishing buddy! Pets can be carriers of harmful exotics too. Pets should be rinsed thoroughly in warm water, towel dried and brushed well after each fishing or wading trip.

Eliminate water from equipment before transporting. Clean and dry anything that comes into contact with the water (boats, trailers, equipment, clothing, dogs, etc.).

Taking time to prevent the spread of aquatic hitchhikers will help assure the resources are protected from harmful, exotic species.

Report aquatic weed problems in public waters to the Aquatic Nuisance Species Program, SCDNR, by calling (803) 755-2836.
The South Carolina Department of Natural Resources prohibits discrimination on the basis of race, gender, color, national origin, religion, disability or age. Direct inquiries to the Office of Human Resources, P.O. Box 167, Columbia, S.C. 29202.
