

## Marine Game Fish Tagging Program

### Monthly Summary

May 2025

During the month of May 2025, a total of 564 fish were tagged and released and there were 131 recaptures reported. Because program activity is ongoing, this report represents approximate numbers and may not be reflective of total overall activity.

| Species             | Tagged | Recaptured and released | Recaptured and harvested |
|---------------------|--------|-------------------------|--------------------------|
| Drum, Red           | 291    | 59                      | 15                       |
| Flounder, Southern  | 121    | 19                      | 5                        |
| Sheepshead          | 54     | 7                       | 1                        |
| Drum, Black         | 46     | 8                       | 5                        |
| Cobia               | 45     | 9                       |                          |
| Grouper, Gag        | 3      |                         |                          |
| Bass, Striped       | 2      | 1                       |                          |
| Amberjack           | 1      | 1                       |                          |
| Spadefish, Atlantic | 1      |                         |                          |
| Snapper, Red        | 1      |                         |                          |
| Monthly Totals      | 564    | 105                     | 26                       |
